Website Design & Services

In today's business market your business' website is a representation of who you are and what you do. Is your website communicating the right message? By focusing on current standards for design, technology, and optimization Simply Bits' web design solutions can help you communicate and perform effectively to meet your online business goals.

At Simply Bits we build each website for your unique needs. We use an effective blend of off-the-shelf software and custom development to create a solid yet affordable solution. Our designers will work with you to create a site that uses modern design and marketing techniques to communicate the right message with a professional look and feel. Care is taken with each website to improve performance as well as meet search engine optimization standards.

By following these standards we create professional solutions with a solid framework that can easily be expanded to support future requirements. The results are designed to help you meet your business goals, compete in emerging markets, and maintain a professional digital presence.

Web Design Packages

Websites are a dime a dozen, but effective websites are rare. At Simply Bits our goal is to provide your organization with professional website solutions designed and built to meet your business goals. Communicate a message, sale a product, cultivate a community – our skilled team can do it all.

Website Platform

Small Business Website

Includes: Commercial CMS installation and configuration. Implementation of site design, homepage, up to 5 landing pages, 5 content pages, contact form, site map. Pre-deployment SEO audit. Deployment to production environment. Not included: hosting.

E-commerce Platform

Includes: E-commerce software installation and configuration. Implementation of site design, homepage, up to 5 landing pages or product categories, up to 5 custom content pages, up to 10 products. Configuration of email and print templates, shipping modules, payment modules, SEO site map, security. Pre-deployment SEO audit. Deployment of final solution to production environment. Not included: 3rd party license, hosting.

Design Strategy

Template Design

Template consists of the purchase and limited customization of an approved template site design. Customizations include up to 4 hours of designer changes to colors, images, and layout modifications. If further design time is required, it is billed at the standard hourly rate upon approval of client.

OR

Custom Site Design

Custom design service consists of a complete creative design process with up to 5 drafts or iterations of design mock-ups for review and acceptance. If further design iterations are required, designer time is billed at the standard hourly rate upon approval of client.

Extra Options

Extra Page Pack

Includes an additional 2 landing pages or 5 content or product pages per pack.

Responsive Design

Extra design considerations to make site design and content regions dynamically change to support mobile, tablet, or small screen sizes.

Print Friendly

A custom page print header and media styling of printable content regions.

Products, services, and prices subject to change without notice. Some limitations apply. See associate for details.
